About PULSUS

Pediatric neurology or child neurology refers to a specialized branch of medicine that deals with the diagnosis and management of neurological conditions in neonates (newborns), infants, children and adolescents. The discipline of child neurology encompasses diseases and disorders of the spinal cord, brain, peripheral nervous system, autonomic nervous system, muscles and blood vessels that affect individuals in these age groups. Overall, about 40% to 50% of the patients treated in a typical pediatric neurology practice have epilepsy, while 20% have learning difficulties or developmental problems and 20% are suffering from headaches. The remainder are treated for rare or unusual conditions such as metabolic or genetic disease. Many centers are equipped with the specialized facilities and knowledge needed to treat very specific disorders such as rare neurodegenerative conditions, intractable epilepsy or pediatric stroke.
