Future Shape of Petroleum Engineering: Petroleum Engineering and Natural Gas Accessions, Organizations & Research

Conference Dedicated to Innovate Solution to the Industrialist and Researcher Challenges

Your single Destination to reach Largest Assemblage of participants from Petroleum Community

Opportunity beyond any Comparison to Attend & Network

Experience the Global Ambiance with Researchers with Similar Significance

Make New Associations and Fostering Potential Partnerships

Learning & Knowledge in a Single Package

Worldwide Acknowledgement to your Research Profile

Explore the best in Cutting Edge Research

Learn Beyond your Field of Interest

Professional Development to Elevate your Knowledge and Skills

Petroleum Engineering and Natural Gas 2018

Speakers Representation from 50+ Countries

1 Conference | 2 Days | Global Congress on Petroleum Engineering and Natural Gas Recovery

15 Keynote Talks | 75 Plenary Speakers | 17 Interactive sessions

Symposia | Workshops | Best Poster Award

200 Attendees | 50 Professors | and many more . . .

Greetings!

Welcome to most exciting and fascinating Dubai, UAE

Within this splendid setting, we plan to deliver a conference that will exceed your expectations.

During this year's Conference, we hope that you will seize the opportunity to rekindle ongoing connections and spark new ones with your colleagues from around the globe. It's with great pleasure and great honor to invite you to the ***"Global Congress on Petroleum Engineering and Natural Gas Recovery"*** scheduled during ***December 06-07, 2018 at Dubai, UAE.***

The Conference will be organized around the theme ***"Exploring Innovation and vivid techniques in Petroleum Engineering & Natural Gas Recovery"***

Petroleum Engineering 2018 anticipates more than 500 participants around the globe to experience thought provoking Keynote lectures, Oral & Poster presentations. This year conference will offer ample opportunities for all stakeholders working on Petroleum Engineering, Geology and Chemical Engineering to expose their research work.

Our conference aims to gather the Researchers, principal investigators, experts, Petroleum Engineering and researchers working on brain from both academia and health care industry, Business Delegates, Scientists and students across the globe to provide an international forum for the dissemination of original research results, new ideas and practical development experiences.

This year's Conference program, coupled with the Business Opportunity Exchange, is an event you can't afford to miss!.

Sincerely

Alayna Cathalin

Alayna Cathalin

Program Manager | Petroleum Engineering 2018

Organizing Committee

We are back again! Conference that dedicated to Innovate Solution to the Industrialist and Researcher, one conference which future the shape of Petroleum Engineering and Natural Gas. Our Conference will organize and allow to access the global researchers around the world in a single platform. Petroleum Engineering 2018 will provide a great opportunity beyond any comparison to attend and network with Petroleum Engineers, Geologist and Chemical Engineers Community.

Join us at our 2018 edition of Petroleum Engineering to Experience the Global Ambiance with the Researchers who work with similar significance of research. Petroleum Engineering and Natural Gas 2018 will help you to get answers to all your queries related to your research work and also it creates an great opportunity to make new associations and also helps to foster potential partnerships. Petroleum Engineering 2018 will be an great platform for you to create long lasting relationship with the fellow researchers from Petroleum Engineers, Geologists and Chemical Engineers Community.

Get worldwide acknowledgement to your research profile where more than 55000 Visitors who analyzed our conference website to attend and submit proposals of their research work. Where this was recorded as the highest number of Visitors from both, developed and developing nations. While we penetrate the study of visitor, navigation, and traffic patterns to determine the success of our conference website majority amount of traffic we receive from cities like New York, London, Valencia, Amsterdam, Madrid, Barcelona, Athens, Sydney, Paris, Frankfurt, Tokyo, Osaka, Melbourne, Moscow and Vienna.

Petroleum Engineering 2018 website is attracting 56000+ Petroleum Engineers, Geologists, Chemical Engineers, Research scientists, Petroleum Organizations and societies, Oil and Gas companies, Petroleum Industries, Petroleum associations, Professors and Students.

This unique opportunity that we extend to our speakers and attendees is not being offered by any other conference organizers. Through this the abstracts and research profiles of our speakers and organizing committee members getting global visibility which is an additional feature that you would be receiving in addition to networking opportunities before, during and after the conference.

Petroleum Engineering 2018 salient features

- Meet Academia and Industry visionaries to get inspired
- Expand your knowledge and find solutions to problems
- Knowledge, Benchmarking and Networking offered at one place
- Forge connections and for global networking
- Highly Organized and Structured Scientific programs
- Poster presentations and world class exhibitions
- Participation by Stalwarts from various international societies
- Internationally renowned speakers and scientists representation
- Career guidance for early career researchers and students
- Interesting scientific deliberations and discussions
- Perfect platform for Global Networking

THURSDAY, December 06

08:00-09:00

Registration

09:00-09:30

Opening Ceremony

09:30-10:15

Awards Banquet and Closing Ceremony

Purpose

With members from around the world focused on learning about Petroleum Engineering and Natural Gas Recovery, this is your single best opportunity to reach the largest assemblage of participants from the scientific community.

Conduct demonstrations, distribute information, meet with eminent personalities, and make a splash with latest research innovations at this outstanding event.

Goals

- The conference program emphasizes evidence-based practice, educational innovation, practical application, and peer to peer networking and collaboration.
- The goals of the conference is to provide a transformative professional development experience through
- Bringing together the world's scientific experts to catalyze and advance scientific knowledge about Petroleum Engineers, Geologists and Chemical Engineers to present the most recent research findings, and promote and enhance scientific collaborations around the world.
- Bringing together community leaders, scientists, and policy leaders to promote and enhance programmatic collaborations to more effectively address Petroleum, Oil and Gas problems and overcome barriers that limit access to care and services.

Objectives

- After participating in this meeting, attendees should be able to
- Discuss emerging issues in Petroleum Engineering
- Discuss and apply recent research findings related to Petroleum Engineering
- Disseminate the diverse voices of breakthrough innovators with visionary and practical solutions.

Who should attend?

Petroleum Engineers, Geologists, Chemical Engineers Research scientists, Oil and Gas Organizations and societies, Business delegates, CEO's and R&D Heads from Industries, Directors, Industrial Leaders, Petroleum companies, Oil and Gas Industries, Petroleum associations & foundations, Professors and Students from Academia in the study of Petroleum Engineers, Geologists, Chemical Engineers and researchers who utilize novel techniques and knowledge in Petroleum.

Scientific Sessions

Petroleum Engineering

Advances in Drilling Engineering

Petroleum Geology

Petroleum Economics

Natural Gas

Computer Application of Petroleum Engineering

Petrochemistry

Reservoir Engineering

Major Challenges in Petroleum Industry

Environmental Hazardous of Petroleum

Industrial Application of Petroleum Engineering

Exploration, production and storage

Advance Natural Gas Engineering

Refining and Distillation

Recent Innovation in Petroleum Technology

Microbial degradation of Petroleum Product

Petroleum Engineering 2018 Outlook

Explore the best in Cutting edge Research

Change to learn beyond your field of Interest

Keynote sessions by worlds most eminent and distinguished researchers

Conference Participation Inspires, Rejuvenate and Energize participants

Petroleum Engineering 2018 an unique platform to increase your reputation within the Petroleum Sector

Learning and Knowledge in a single package

Speaker's representation from 50+ Countries

1 Conference | 2 Days

Petroleum Engineering 2018 address the important topics and informative approaches of Petroleum Engineering and Natural Gas Recovery. This is going to be the most beneficial Petroleum conference in which the entire Petroleum Engineering and Natural Gas is included. The main intention of the conference is to deal with the unique methods of Petroleum and its innovative strategies.

Petroleum engineering is a branch of engineering that deals with hydrocarbon and produce petroleum gas and crude oil. Scrutiny and Production are allowed to fall within the upstream sectors of the oil and gas industry. Petroleum engineering conference express towards important issues as well as future approach of global engineering industry. It is one of the greatest and most assuring international conference where oil and gasoline engineering experts in addition to selection makers will share their ideas and debate on numerous factors of the demanding situation, hazard and financial hope at entire integrated strength and utilities supply chain..

The fuels provides building blocks for every other career to specifically carried out its work. Petroleum Engineering deals with the production of petroleum gas and crude oil. Petroleum is a liquid mixture originated in geographical improvement in the Earth's surface. It is refined to numerous form of fuel for various aspects. Petroleum is mixture of numerous number of hydrocarbons, which chiefly found molecules such as alkanes, cycloalkanes, aromatic hydrocarbons, or complicated chemical like asphaltenes.

Dubai is one of the seven emirates that constitute the United Arab Emirates (UAE) in the eastern Arabian Peninsula. “Dubai” also refers to that emirate’s main city, which is often called “Dubai City” to distinguish it from the emirate. Over 90 percent of the emirate’s population resides within Dubai City. The modern emirate of Dubai was created with the formation of the United Arab Emirates in 1971. Dubai shares legal, political, military, and economic functions with the other emirates within a federal framework, although each emirate has jurisdiction over some functions such as civic law enforcement and provision and upkeep of local facilities.

Dubai has the largest population and is the second largest emirate by area, after Abu Dhabi. It is known as the most modern and progressive emirate in the UAE. With Abu Dhabi, it is one of only two emirates to possess veto power over critical matters of national importance in the UAE. Dubai has been ruled by the Al Maktoum dynasty since 1833. The emirates’ current ruler, Mohammed bin Rashid Al Maktoum, is also the Prime Minister and Vice President of the UAE.

Dubai has attracted world-wide attention through innovative real estate projects and sports events. This increased attention, coinciding with its emergence as a world business hub, has also highlighted human rights issues concerning its largely foreign workforce.

Dubai Shopping Festival was promoted as a tourist attraction, and now it attracts up to 3 million visitors from around the globe every year. It prides in being a premier festival and the largest shopping extravaganza dedicated to festivities and shopping. The duration of DSF is mostly one month, where one finds sale and crazy discounts in the stores for almost any item. During the entire month, there would be a range of activities held in every mall, parks, and other tourists’ attractions. The activities are unique to every place, so your shopping experience doesn’t get boring. Moreover, innovative programs are introduced every year to make your experience unique and remarkable.

Dubai Climate:

The climate of Dubai, the most populous of the United Arab Emirates, is subtropical desert, with very mild or pleasantly warm winters, and scorchingly hot summers, in which the combination of temperature and humidity makes the heat really oppressive. In fact, in summer the wind usually blows directly from the sea, bringing moisture from the Persian Gulf.

Transport within Dubai:

Train: The Dubai Metro is the cheapest and easiest way to see the emirate. A modern fully automated rail system with red and green lines. Both lines have state-of-art modern designs, providing many great features for general public, including retail outlets, wi-fi connectivity, ATM machines, easy accessibility for disabled passengers. It has an extensive network connection to public transport buses and taxis, in addition to many other exciting features.

The Red Line, which runs from Rashidiya Station to UAE Exchange Station, consists of 29 stations and offers free multistory vehicle parking for public transport users at Rashidiya Station and Nahkeel Harbour & Tower station. The Green Line, which has 18 stations, runs from Etisalat Station, where it provides park and ride facility, it passes all the way reaching the oldest and busiest souqs along the creek, the Dubai Healthcare City and Jaddaf area as well. Both lines meet at two interchange stations which are Union Station and BurJuman Station.

Bus: Dubai is best known for its glitz and glamour, but it also has a low cost and efficient public transport system – including a fantastic network of buses. Dubai's network of buses is quite extensive and buses are a great connection point from the metro to your destination. They are very affordable, accept Nol cards as a form of payment, and can get you to destinations that the Metro does not reach – such as Jumeirah Beach. Buses can also take you between emirates, which the Metro system is not currently designed to do, and is an affordable way to travel if you are on a budget.

There are 114 lines, including 170 double deckers, 31 of which are feeder buses for the Metro, and they generally run from very early in the morning to late at night (times vary for each route).

Water taxis: Whereas the abra is confined to navigating the Creek, Dubai's relatively new fleet of water taxis, operated by the RTA, are able to navigate the waters of the Arabian Gulf. The taxis are very sleek and modern looking, and are a new concept by the RTA to try and ease the daily congestion on Dubai's most travelled roads. The taxis are equipped with all modern facilities, conform to the safety requirements of the RTA, and can travel across the waters of the Arabian Gulf at speeds of up to 25 knots.

Abras: About 153 Abras (traditional boats made of wood) transport people across the Dubai Creek seating around 20 passengers each, a convenient and fun way to travel. They transport approximately 17.4 million passengers every year. For yet another option of travel, choose the waterbus system, a collection of comfortable and stylish motor-powered boats stopping at all major tourist attractions along the Dubai Creek and with all different new tourist route.

Air travel: Dubai International Airport is a hub for Emirates and FlyDubai and has a large duty-free shopping centre. The airport has won numerous awards for its excellence in design and services. A third terminal, which fully supports the new Airbus A380, was opened in October 2008 and doubled the airport's capacity. A new concourse catering to the A380 was completed in late 2012.

Dubai is investing heavily in developing the reach of its airline Emirates. The hope is to develop Dubai's air transportation industry to the point that passengers from any city can fly direct to Dubai.

Accompany Partners' Policy:

We respectfully remind you that partners accompanying delegates/speakers are not eligible to attend conference sessions and do not qualify for refreshments and lunches during the day unless they have registered.

Any partner wishing to attend events not previously selected and paid for in his or her registration may do so at the Conference Registration desk.

We would be pleased to accommodate any requests where possible.

Registration and Accommodation

Policy:

Registration and accommodation changes will not be accepted unless made in writing.

Changes made within 14 days of the event may incur costs due to specific hotel and venue policies

Cancellation Policy:

Registration cancellations will not be accepted unless made in writing.

Cancellations request made before 05 October 2018 will be refunded less 25% of the Conference Registration fee, to cover administration costs.

No registration refunds will be processed after this date, however, substitute delegates are welcome.
