worth US \$ 2.6 trillion -**

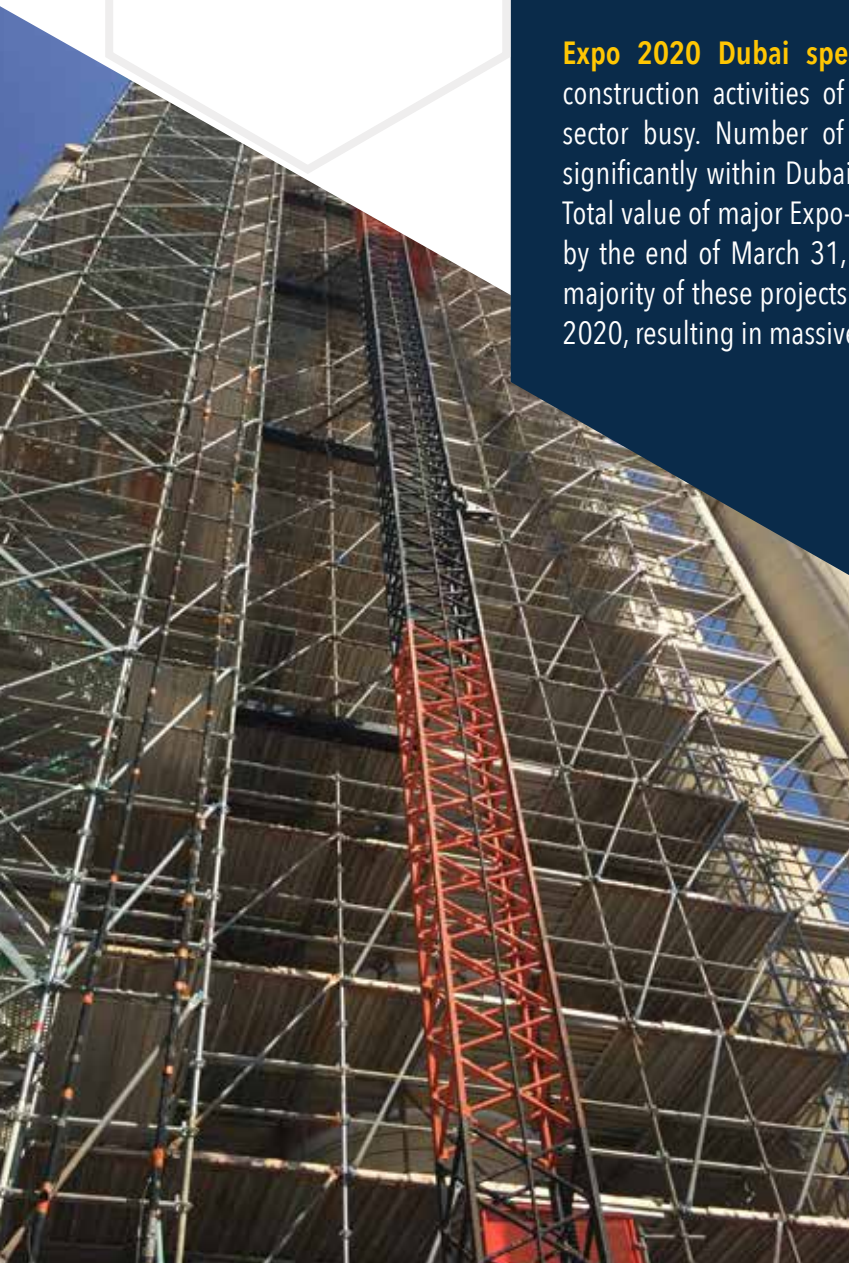

THE GCC STORY...

Rapid Growth of Construction Industry to Fuel Scaffolding and Access & Utility Equipment Markets in GCC

Strong Economic Growth: GCC countries are expected to see a pick-up in economic growth in 2018 and 2019 thanks to the higher oil prices and improved output, along with some easing in fiscal consolidation.

GCC's construction industry is upbeat foreseeing growth: The combined value of the 22,680 active construction projects in the GCC has exceeded US\$2.43 trillion in Nov 2017 itself. Kingdom of Saudi Arabia (KSA) has more than 5000 active projects worth US \$ 819 billion. Indeed, UAE remains No.1 construction market in the GCC, and is on track to deliver growth in 2018-19 in the lead-up to Expo 2020.

Expo 2020 Dubai spearheading growth in construction sector: Hectic construction activities of Expo 2020 projects have kept Dubai's construction sector busy. Number of construction cranes and the workers has gone up significantly within Dubai South - where the Expo 2020 village will be located. Total value of major Expo-related construction projects reached US \$ 42.5 billion by the end of March 31, 2018, driven by both public and private sectors. The majority of these projects are poised to complete before Expo begins in October 2020, resulting in massive job creation as well.

Safe working at heights Increased productivity at lesser risks

Interscaff Arabia 2020

The international trade fair on Scaffolding, Formwork, Access Equipment and Architectural Designs will be held at the Expo Centre Sharjah, UAE.

INTERSCAFF ARABIA will pull in a relentlessly extending number of suppliers & manufactures' and in addition business visitors to take an interest and facilitate accomplice and work together with one another on the latest market movements and lucrative business openings in the individual field and disseminate and look at their business in the GCC market.

Scaffolding & Formwork

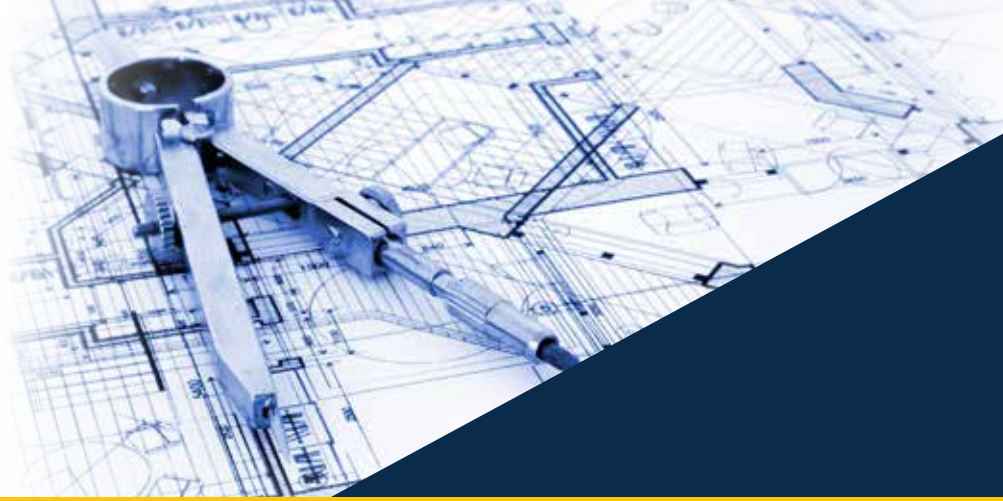

Global scaffolding market is categorized on the basis of material, product, location, end-use, and geography. The aluminum scaffolding segment is expected to have the highest growth. In 2016, the external scaffolding segment accounted for 83% of the market globally and is projected to continue to dominate over the forecast period. This segment is expected to reach a valuation of US\$ 68.27 billion by the end of 2026.

The region's formwork and scaffolding sector is fast evolving by incorporating technology to meet the demand for speed and quality. Of late, GCC investors too have shifted their focus towards infrastructure and tourism-oriented developments while keeping costs saving in mind.

Broad Profile of Exhibits

- Framed Formwork
- Timber-Beam Formwork
- Column Formwork
- Single Sided Formwork
- Tableforms
- Automatic Climbing Formwork
- Crane-Lifted Climbing Formwork
- Shoring Towers
- Tunnel Formwork
- Bridge Formwork
- Working & Protection Platforms
- Protection Screen
- Access Systems
- Formwork Accessories
- H Type External Front Scaffolds
- Flanged Scaffold Systems
- Cup Lock Scaffold Systems
- Telescopic Stud Poles
- H Type Tower Mould Scaffold
- Table Type (Panel) Mould Scaffold
- Suspended Scaffold
- Scaffold Accessories

The 'FOREMOST' in Middle East & GCC ...honouring the best !

Architects... here is your chance to gain recognition at the most prestigious award in Middle East

Welcome aboard all Architects whose built work demonstrates a combination of those qualities of talent, vision, and commitment, which has produced consistent and significant contributions to the Islamic humanity and the built environment through the art of architecture.

The Sharjah Islamic Architecture Award seeks to identify and encourage architectural concepts in the fields of community development, area conservation, contemporary design, preservation of the environment and landscape design.

Eligibility

All submissions must be the work of Architects/ Firms based in Middle East. Any client or organisation who wishes to enter a project must have written permission from the landscape architect or design firm.

Architects of projects based in Middle East and GCC - concept or to be built in 2020-21

All categories require a minimum of 5 entrants to be eligible for judging.

Powered Access & Utility Equipments

Mobile Elevating Work Platforms (MEWPs): Self-propelled Booms, Scissor Lifts, Vehicle Mounts, Personnel Lifts, Trailer Mounts, Low Level Access, Atrium Lifts and Crawler Mounted Platforms, Suspended Access Systems, Mast Climbers and Hoists.

Architecture Design Tools, Softwares & 3D

Designing buildings is a complex task that's all about detail as much as the grand vision of the designer. Architectural software enables the original concept to be honed into a practical work or home space. Architects, designers, or hobbyists, you can use a 3D modeling software to create good overviews of a building or try new home design ideas.

SHARJAH- The Host City

Sharjah is one of the most diversified economies in the MENA region and the cultural capital, industrial hub and education hotspot of the United Arab Emirates (U.A.E.).

Centrally located between Europe and East Asia, with convenient access to major international airports and ports on both the Arabian Gulf and Indian Ocean, Sharjah is a strategic investment destination. Sharjah's economic resilience is further fueled by 55,000+ SMEs that already benefit from the competitiveness of the emirate's supply chain. Over 13,000 companies, with investors from more than 157 nationalities, are currently established in Sharjah's free zones.

Expo Centre, Sharjah - The Venue

Located in the United Arab Emirates (UAE), Expo Centre Sharjah naturally commands a strategic position at the heart of the region's business and commercial hub. As a stable and dynamic country, the UAE is an established gateway to the Middle East and beyond into the CIS region, North Africa and the Indian Subcontinent.
